TURFLINE®

Lawn grass with fast establishment

Turbo contains the unique turf annual ryegrass which is the fastest germinating grass. At the same time QuickAction© ensures the very best establishment and growth and performs well even at low temperatures in early spring or late autumn.

Fast establishment means fewer weeds and a job well done!

The speed at which your lawn establishes itself is very important. Fast establishment helps prevent weeds from establishing. The grass will create a dense sward fast which gives less space and opportunity for weeds in the crucial phase of establishment. Secondly, it gives the resulting feeling of a job well done.

The turf annual ryegrass in the Turflina Turbo mixture is ultimately the fastest germinating and establishing grass anyone can find.

Turflina Turbo Cold & Temperate
